SO CALLED FREE TRADE

Our Congress is acting exactly like the young man that sold the ten thousand acre farm he inherited from his grandfather. He lived "high off the hog" by selling a thousand acres a year for ten years. When he had sold all of his inheritance he went on relief for the rest of the citizens to support or had to work at minimum wage for the new owner.

America is selling its productive wealth at the rate of nearly a trillion dollars each year. It is doing exactly what Africa did in the 18th and 19th centuries. Take a good look at the poverty of Africa today and you will see what America will look like in less than fifty years unless Congress and the new president use a little common sense.

We are using this trillion dollars to bid up prices so the workers and retired citizens cannot make ends meet.

Our money is out of control and the end results will be what happened in Germany in the 1920s if we don't act now.

1. Congress must immediately put an export tax on the sale of what is left of our productive wealth high enough to stop the sale of our life support system.
2. We must practice intelligent free trade. We must stop the lopsided practice of selling the factory instead of the products made in the factory. In simple terms always trade the cream, milk, butter and cheese. Never trade or sell the cow that produces the products that gives our middle class citizens jobs. In other words free trade only on products.
3. America had been living high off the hog and this stupidity is coming home to roost in the form of high prices and lost jobs.
